

# Systematické postavení kornatky krvavé — *Peniophora*

*sanguinea* (Fr.) Höhn. et Litsch.

Taxonomic position of *Peniophora sanguinea* (Fr.) Höhn. et Litsch.

Zdeněk Pouzar

## S U M M A R Y

*Peniophora sanguinea* (Fr.) Höhn. et Litsch. undoubtedly belongs to the genus *Phanerochaete* P. Karst. as correctly outlined by Donk (*Persoonia*, Leiden, 2 : 223—227, 1962) and by Parmasto (*Consp. Syst. Corticiacearum*, Tartu, p. 82—85, 1968). Nevertheless, both these authors abstained from publishing the pertinent new combination. As the name is needed for a popular handbook (Veselý, Kotlaba et Pouzar, *Přehled československých hub — A conspectus of Czechoslovak fungi*) I am proposing it here.
