19. *Coprinus laanii* Kits van Waveren

Summary

Coprinus laanii Kits van Waveren (1968), recorded hitherto from the Netherlands and Great Britain, was collected by my daughter Milada Svrčková July 10, 1969, in Northern Bohemia near Růžová (Hřensko), in a forest on cut surface of a *Betula* sp. stump. Four fruit-bodies agreed perfectly with descriptions in the literature cited.
