Czechoslovak records

22.—24. *Myxarium grilletii* (Boud.) Reid, *Sebacina dimitica* Oberw. a *Sebacina microbasidia* Christ. et Hauerslev in Christ.

Summary

Three species of *Tremellaceae*, new for Czechoslovakia, are described and illustrated according to the author's collections: *Myxarium grilletii* (Boud.) Reid, collected several times on rotten wood of fallen branches of *Quercus robur* and *Carpinus betulus* near Prague in Central Bohemia, *Sebacina dimitica* Oberw. on rotten wood of a broken *Salix* (cf. *fragilis*) trunk in Southern Bohemia, and a tetrasporic form of *Sebacina microbasidia* Christ. et Hauerslev in Christ., collected on very rotten moist wood of a fallen trunk of *Betula pendula* in Central Bohemia.
