

# *Pyricularia luzulae* Ondřej sp. n.

*Michal Ondřej*

Na listech biky lesní, *Luzula sylvatica* (Huds.) Gaud., našel autor roku 1973 parazitickou houbu (*Fungi imperfecti, Hyphomycetes, Dematiaceae*), jejíž taxonomické zařazení nebylo jasné. Nové sběry houby z let 1983 a 1984 umožnily provést detailní studium a zařadit houbu do rodu *Pyricularia* Saccardo (*Pyricularia luzulae* Ondřej sp. n.). V letech 1984 a 1985 byla houba nalezena i na listech biky hajní, *Luzula luzuloides* (Lam.) Dandy et Willmott.

---

The author found a parasitic fungus (*Fungi imperfecti, Hyphomycetes, Dematiaceae*) on the leaves of *Luzula sylvatica* (Huds.) Gaud. in the year 1973, taxonomic classification of which was not clear. In the years 1983—1984 new collections made possible to carry out its detailed study and to class the fungus with the genus *Pyricularia* Saccardo (*Pyricularia luzulae* Ondřej sp. n.). The fungus was found even on the leaves of *Luzula luzuloides* (Lam.) Dandy et Willmott. in the years 1984—1985.
