Malysheva E. F. and Morozova O. V. (2009): Notes on *Hemimycena* from European Russia. – Czech Mycol. 61(1): 27–71.

A study of the genus *Hemimycena* in European Russia has revealed 19 taxa. Ten species are recorded for the first time in this territory and three new species (*Hemimycena globulifera*, *H. stiriispora*, and *H. tanjae*) are proposed. All species examined are described in detail and fully illustrated. Also a identification key to delimit the studied species is provided.

**Key words:** Agaricales, *Hemimycena*, new species, European Russia, taxonomy.

Malysheva E. F. a Morozova O. V. (2009): Rod *Hemimycena* v evropské části Ruska. – Czech Mycol. 61(1): 27–71.

Studiem rodu *Hemimycena* v evropské části Ruska bylo zjištěno 19 taxonů. Deset druhů bylo v této oblasti nalezeno poprvé; navíc jsou popsány tři nové druhy (*Hemimycena globulifera*, *H. stiriispora*, *H. tanjae*). Všechny studované taxony jsou podrobně popsány a ilustrovány a je navržen klíč k jejich určování.
