Kučera V., Lizoň P. and Kautmanová I. (2010): Geoglossoid fungi in Slovakia II. *Trichoglossum octopartitum*, a new species for the country. – Czech Mycol. 62(1): 13–18.

Some recent Slovak collections of *Trichoglossum* were identified as the rare species *T. octopartitum*. The species had not been reported before from Slovakia or central Europe. The identification was confirmed by comparing the collections with the type material originating from Belize.

Key words: Ascomycetes, grassland fungi, biodiversity, description, taxonomy.

Kučera V., Lizoň P. a Kautmanová I. (2010): Geoglossoidné huby Slovenska II. *Trichoglossum octopartitum*, nový druh pre naše územie. – Czech Mycol. 62(1): 13–18.

Niektoré recentné slovenské zbery rodu *Trichoglossum* sme určili ako *T. octopartitum*. Tento druh nebol doteraz udávaný zo Slovenska, ani zo strednej Európy. Určenie bolo overené aj porovnaním s typovým materiálom z Belize.
