

## Acknowledgements to reviewers

The Editorial Board of Czech Mycology is grateful to the following specialists who reviewed one or more manuscripts accepted for publication in volumes 65–69, as well as other papers during the years 2013–2017 (rejected, withdrawn or not finalised in this period). Researchers who provided a general evaluation of the submitted manuscripts (preceding the reviews, or as an alternative to them) are acknowledged too, as their contributions are of the same importance. Jan Willem Jongepier is acknowledged for language review of all published papers, including valuable factual remarks on some of them.
