

Editorial note

Czech Mycology is proud to publish quality articles by Ukrainian authors. We express our highest respect to scientists who continue their work and contribute to the advancement of mycological knowledge even in the harsh conditions of military hostilities. In the current issue two well-written papers are included, providing valuable information on lesser known groups of fungi and filling gaps in the mycological data of various habitats in Ukraine.

Dear Ukrainian colleagues, we sincerely wish you a great deal of courage in your admirable work and better conditions for your research in the upcoming years!
